

APP DEVELOPMENT

- Learn what App Development means (creating applications for phones or tablets).
- Understand the types of apps:
 - Native Apps (built for one platform like Android or iOS).
 - Web Apps (run in a browser).
 - Hybrid Apps(a mix of native and web apps).
- Follow beginner-friendly resources like YouTube tutorials, freeCodeCamp, or W3Schools.
- Start learning simple tools like Android Studio to create apps using your preferred language.

TASK

Make a simple mobile app using Android Studio:

- Add a button that changes the screen color.
- Include a text box where users can type and see their text displayed.
